EFFECTIVE VIDEO USE IN YOUR WORDPRESS BLOG

WHERE'S THE CONTENT?

You've spent hours (maybe months) creating a gorgeous website or maybe you paid someone else to design it for you, but what's next? How do you consistently add content to your site?

Learn tips and hacks to use video to create content for your blog, social media, newsletters and much more. Never run out of content again!

If you struggle to add good, relevant content to your blog, book Tricia today!

TIPS & TRICKS TO HIT RECORD

JUST DO IT!

One of the hardest parts of incorporating Video into your marketing plan is simply hitting record or "go live".

After a 6 month marathon of Live Streaming every day, Tricia knows all of the tricks to overcome the fear of video and will share them with you.

THE IMPORTANCE OF VIDEO MARKETING:

- 74% of all internet traffic is video.
- By 2021, 82% of all internet traffic will be video.
- Video helps build the know, like & trust factor much faster than other marketing strategies.
- Video increases online engagement.

YOU Can Market with VIDEO Too!

"In 2015, the last thing I would have ever wanted to do is stand up in front of a group of people and give a presentation or speech. Discovering Periscope (Twitter's version of Facebook Live) in December 2015 changed all of that!

I now create weekly videos, live stream via Facebook Live once or more a week and even recently attended a Toastmaster's Meeting. If I can make that drastic of a change, you can too! I'll provide tips to help you break the fear of getting in front of the camera and mastering video so that you don't get stuck in twentieth-century marketing."
